

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. *(currently amended)* A carrier sheet comprising:

a printed single paper sheet having a contour and having printed matter on at least a front face thereof, said printed matter containing card information printed in a card area having a contour smaller than the contour of the paper sheet, and said paper sheet having other information outside the card area,

a polyfilm patch adhered over said card area and over said card information printed thereon,

a thin flexible patch of magnet material adhesively secured on a rear face of said paper sheet and extending over said card area, said patch of magnet material having a contour smaller than the contour of the paper sheet and larger than the contour of said card area,

a die-cut in said paper sheet delineating the contour of said card area and extending through said polyfilm patch and paper sheet and into said patch of magnet material, and

holding means along said die-cut to hold said die-cut card in said paper sheet.

2. *(currently amended)* A carrier sheet as claimed in claim 1 wherein said die-cut extends only partly into said patch of magnetic material to define an uncut region, form said die-cut forming a burstable region in said uncut region of said magnet material along said die-cut, said burstable region constituting said holding means.
3. *(original)* A carrier sheet as claimed in claim 1 wherein said die-cut has an ornamental shape.
4. *(original)* A carrier sheet as claimed in claim 1 wherein said printed matter is a common message, said carrier sheet with said die-cut card area being personalized in a laser printing machine.
5. *(currently amended)* A carrier sheet as claimed in claim 1 where die-cut holding tabs are formed along said die-cut and have sufficient retention strength to prevent said die-cut card area to detach from said sheet when processed in ~~said laser printing machine~~ a printer.
6. *(original)* A carrier sheet as claimed in claim 1 wherein said die-cut card is a promotional magnet card.

7. (*original*) A carrier sheet as claimed in claim 1 wherein said printed paper sheet is machine foldable in panels to constitute a glue fold envelope mailer containing an outer printed address panel, and an inner printed message form containing said die-cut card in a panel thereof.

8-13. (*canceled*)

14. (*new*) A carrier sheet as claimed in claim 1 wherein said carrier sheet is a mailer of sufficient size to be foldable into at least two panels for mailing, and wherein said card area is positioned in one of said at least two panels.

15. (*new*) A carrier sheet as claimed in claim 1 wherein the other information outside the card area is associated with the card information.

16. (new) A carrier sheet comprising:

a single paper sheet having a contour and front and rear faces, said front face including a card area on said front face, said card area having a contour smaller than the contour of the paper sheet and being printable with card information, and said front face also including a printable area outside said card area,

a polyfilm patch adhered over said card area on said front face of said paper sheet,

a thin flexible patch of magnet material adhesively secured on said rear face of said paper sheet and extending over said card area, said patch of magnet material having a contour smaller than the contour of the paper sheet and larger than the contour of said card area,

a die-cut in said paper sheet delineating the contour of said card area and extending through said polyfilm patch and paper sheet and into said patch of magnet material, and

holding means along said die-cut to hold said die-cut card in said paper sheet.

17. (new) A carrier sheet as claimed in claim 16 wherein said die-cut extends only partly into said patch of magnetic material to define an uncut region, said die-cut forming a burstable region in said uncut region of said magnet material along said die-cut, said burstable region constituting said holding means.

18. (new) A carrier sheet as claimed in claim 16 wherein said die-cut has an ornamental shape.

19. (new) A carrier sheet as claimed in claim 16 wherein said front face of said carrier sheet is printable using a laser printer.

20. (new) A carrier sheet as claimed in claim 16 where die-cut holding tabs are formed along said die-cut and have sufficient retention strength to prevent said die-cut card area to detach from said sheet when processed in a printer.

21. (new) A carrier sheet as claimed in claim 16 wherein said die-cut card is a promotional magnet card.

22. (new) A carrier sheet as claimed in claim 16 wherein said paper sheet is machine foldable in panels to constitute a glue fold envelope mailer containing an outer printable address panel, and an inner message form containing said die-cut card in a panel thereof.

23. (new) A carrier sheet as claimed in claim 16 wherein said paper sheet is a mailer of sufficient size to be foldable into at least two panels for mailing, and wherein said card area is positioned in one of said at least two panels.

24. (new) A carrier sheet comprising:

a single sheet of letter-size paper having front and rear faces and being foldable into at least two panels for mailing, said front face including a card area, said card area having a contour smaller than the size of the paper sheet, being positioned in one of said at least two panels, and being printable with card information, and said front face also including a printable area outside said card area,

a polyfilm patch adhered over said card area on said front face of said paper sheet,

a thin flexible patch of magnet material adhesively secured on said rear face of said paper sheet and extending over said card area, said patch of magnet material having a contour smaller than the contour of the paper sheet and larger than the contour of said card area,

a die-cut in said paper sheet delineating the contour of said card area and extending through said polyfilm patch and paper sheet and into said patch of magnet material, and

holding means along said die-cut to hold said die-cut card in said paper sheet.

25. (new) A carrier sheet as claimed in claim 24 wherein said die-cut extends only partly into said patch of magnetic material to define an uncut region, said die-cut forming a burstable region in said uncut region of said magnet material along said die-cut, said burstable region constituting said holding means.

26. (new) A carrier sheet as claimed in claim 24 wherein said die-cut has an ornamental shape.

27. (new) A carrier sheet as claimed in claim 24 wherein said front face of said carrier sheet is printable using a laser printer.

28. (new) A carrier sheet as claimed in claim 24 where die-cut holding tabs are formed along said die-cut and have sufficient retention strength to prevent said die-cut card area to detach from said sheet when processed in a printer.

29. (new) A carrier sheet as claimed in claim 24 wherein said die-cut card is a promotional magnet card.

30. (new) A carrier sheet as claimed in claim 24 wherein on said rear face of said paper sheet, one of said panels contains an outer printable address panel, and wherein said inner face contains an inner message form containing said die-cut card.
